- ✓ **Humanitarian aid agencies**
- ✓ **Investors**

When it comes to solar energy kits, insist on VeraSol certification and prioritise quality.

- We use our unparalleled knowledge of the test methods to ensure that each product is sampled and tested correctly.
- We evaluate test results against the quality standards ensuring that every product we certify meets all of the standards.
- We monitor the market ensuring that certified products continue to meet the quality standards.
- We generate comparable data to showcase quality products and drive informed decision-making.

" The greatest value of the program is the role it has played in the international adoption, standardization, and acceptance of quality standards."

Radhika Thakkar, Vice President, Greenlight Planet

"The VeraSol certification provides the basis for the promotion of quality and reliable solar products."

Merijn Havinga, Energy Expert, SNV

How VeraSol works for your business:

- **Development institutions** - Increase the impact of programs by limiting participation eligibility to products that meet minimum international quality standards.
- **Distributors** - Easily source high-quality solar products that meet consumers' performance, durability and safety expectations.
- **Governments** - Grow local markets by using VeraSol's quality assurance framework as a basis for tax and duty policies, voluntary market stimulation programs, and product regulations to protect consumers.
- **Humanitarian aid agencies** - Align program requirements with international standards, ensuring that solar products expand access to energy and transform consumers' lives.
- **Investors** - De-risk investments and maintain brand reputability by financing tested and certified products.

By choosing VeraSol-certified products, you assure your customers that they will receive products that have undergone testing and evaluation against the leading international standards.

Genuine certificates and specification sheets - VeraSol's Product Database provides market actors a quick and easy way to confirm the validity of product certificates and specification sheets/books.

Reliable and accurate data - VeraSol certification is your assurance that the products were sampled and tested properly and that test results are reported accurately.

Test reports issued by internationally accredited laboratories - VeraSol's global network of laboratories have years of experience with the intricacies of the various test methods, ensuring accurate product performance reporting.

Test results evaluated against the IEC quality standards - VeraSol certificates detail how each product complies with the quality standards, confirming that the product meets all the reporting, consumer information and labelling requirements.

VeraSol is your partner of choice for product certification. Contact us or learn more about our [certification process](#).
